Uvod

Korišćene tehnologije

- HTML5
- CSS3
- JavaScript
- jQuery
- PHP

Okruženje

- Visual Studio Code

Funkcionalnosti

- Iskorišćen template, uz izmene u CSS i JS kodu
- Responsive dizajn
- Dinamičko ispisivanje sadržaja iz baze podataka
- Registracija i logovanje korisnika
- Admin panel za brisanje proizvoda iz baze
- Profil stranica
- Forma za kontaktiranje administratora – upis poruke u tabelu u bazi

Opis funkcionalnosti

Na početnoj stranici je ispisana navigacija dinamički, iz baze, a zavisno od toga da li je korisnik ulogovan, prikazuje se link do profila/logout ili linkovi ka registraciji/logovanju. Prikazani su proizvodi, filtrirani SQL upitom tako da se prikažu samo oni ispod određene granice.

Footer je takođe dinamički ispisan, sa istim funkcionalnostima kao header.

Shop stranica ispisuje sve proizvode, kategorije i brendove, dinamički iz baze. Postignuta je paginacija uz prikaz količine proizvoda trenutno na ekranu i mogućnost preskakanja na prvu/poslednju stranicu odmah.

Klikom na “add to cart” se svaki proizvod ubacuje u korpu (Gornji desni ugao), gde je na kraju prikazana finalna cena i gde može pojedinačno svaki da se obriše.

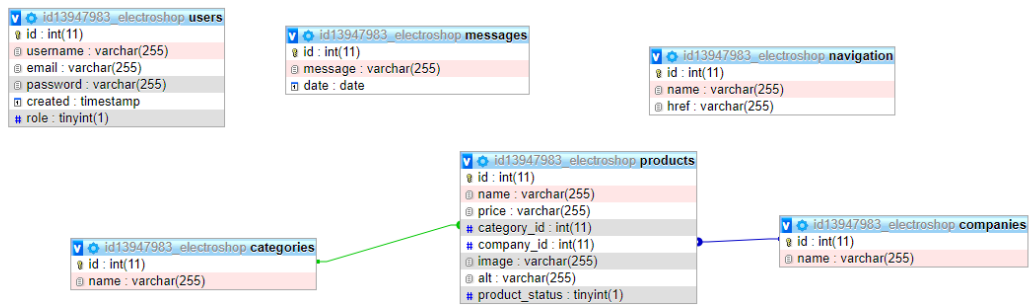

Stranice za registraciju i logovanje prikazuju forme korisniku, sa linkovima, jedna ka drugoj, i omogućavaju registraciju uz proveru unetih podataka.

Profil stranica prikazuje ime korisnika, e-mail iskorišćen pri registraciji i vreme registracije.

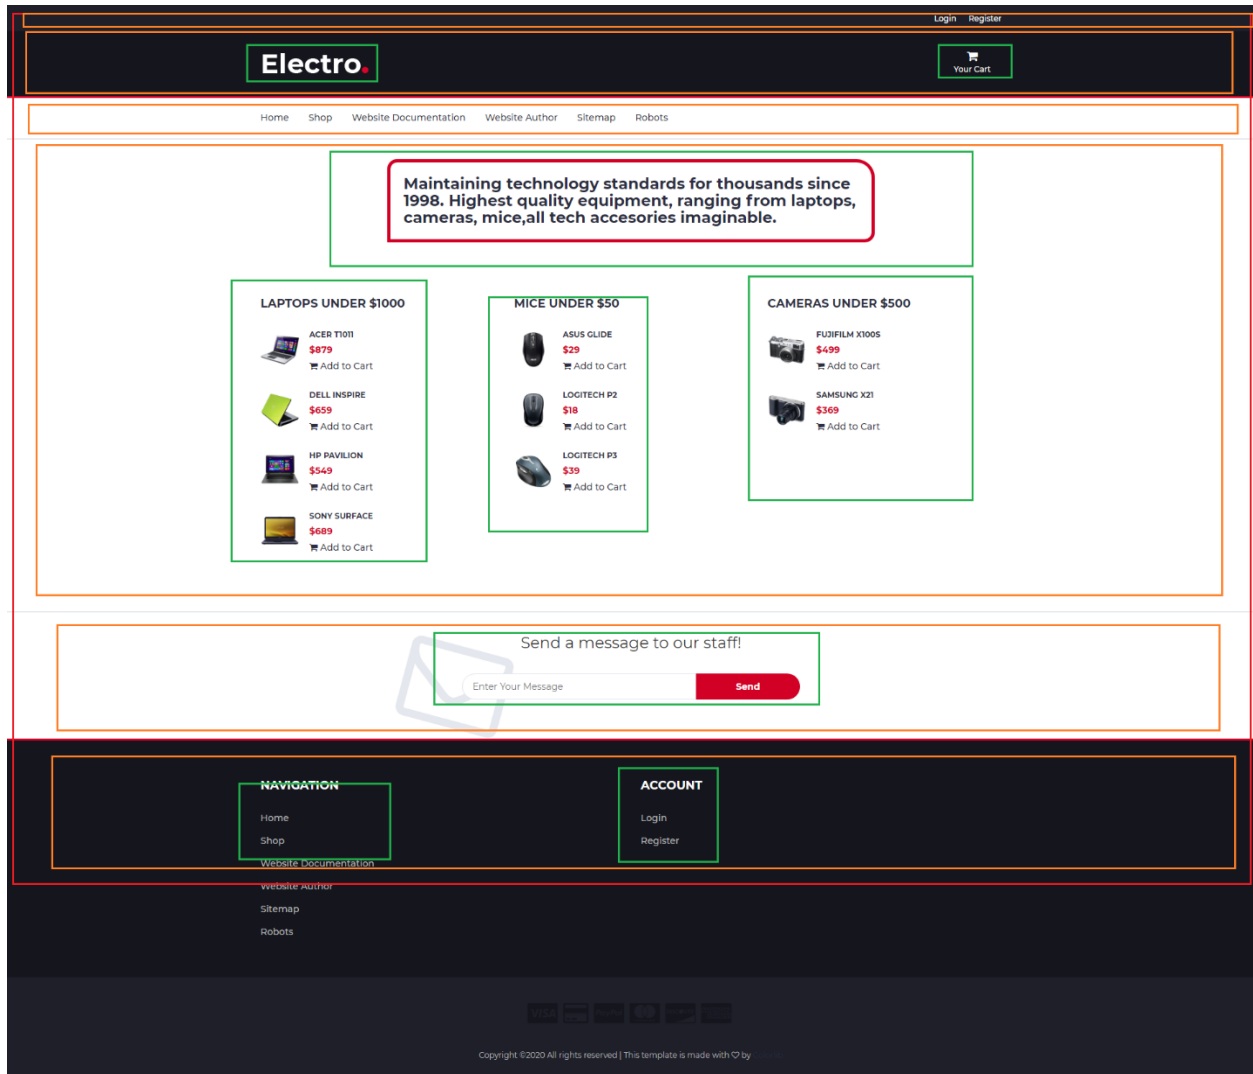

Admin panel (dostupan samo administratorskim nalogima) izlistava sve proizvode iz baze i pruža opciju njihovog, pojedinačnog, brisanja.
